

# **Digital manometer DC 400**

With integrated bar graph display Accuracy 0.5%

## Description

This digital manometer is the ideal solution for local digital display independent of the mains. The integrated battery allows measurements to be made independent of a fixed source of power.

Accuracy, reliability and mechanical resilience make the digital manometer suitable pressure measurement tasks in numerous applications.

The stepped measuring ranges extend from 2 bar up to the high pressure range of 700 bar. For pressure ranges above 50 bar, the casing and parts that come into contact with the measuring medium are made of stainless steel and thus resistant to attack from chemically aggressive media.

The additional integrated bar graph display with a trailing pointer function shows the trend in current working pressure directly. The model P3962 comprises a further 4 ½-digit display for a direct readout of peak value, tare and other parameters. Internal lighting ensures the display is optimally lit for a clear readout even in unfavourable lighting conditions.

The buttons on the front are used for adjustment of the programmable parameters.

The digital manometer meets electromagnetic compatibility requirements (EMC) to EN 61326.

### Features

- Measuring ranges from 2 700bar
- · Fine step selection of nominal pressure ranges
- LC-Display with numerals 11mm high
- Bar graph display with a trailing pointer function
- Tare function
- Password protection
- MIN/MAX-memory
- Internal lighting
- High overload protection

#### Measuring ranges

Overpressure positive 0...2 bar to 0...700 bar

#### Areas of use

Machine construction Plant and apparatus construction Hydraulics, pneumatics Measuring equipment monitoring

#### Model: P3961, P3962
