

# Strain gauge, hand-held measuring instrument

### Description

The E3906 is an economical handheld measuring instrument. The freely scalable LCD-display has  $4\frac{1}{2}$  digits and can be used for strain gauge signals with 0.35 - 3.5 mV/V.

The compact handheld measuring instrument is highly flexible in application.

Commercial external accessible batteries or accus as well as a plug power pack with integrated accu charging function can be used alternatively.

The power saving mode with timer function switches off the instrument automatically after 15 min.

An integrated maximum value memory and a signal inverse function can be turned on and off at any time by a key switch. The status is indicated by LED's on the keys.

Another key switch turns on the 100% calibration control made of the sensor, thus the E3906 can simply be in-calibrated to a sensor and the calibration can be checked at any time.

#### Features

- Display and decimal digit freely scalable
- Mains-, battery-, accu operation
- Disconnection after 15 min
- Calibration control switch
- Maximum value memory
- Signal conversion switch
- Integrated accu charger
- 4<sup>1</sup>/<sub>2</sub> digit LCD-display
- Simplest calibration
- SUB-D15-connector for loadcell

## Applications

- Measurements and control instruments
- Instrument manufacturing
- Machine equipment
- Building of fixtures and special machinery manufacturing
- Calibration service

AE 949 b
